

## **Boom Maintenance Checklist**

	Check to make sure the operating and emergency controls are working.
	Check all hydraulic, pneumatic, electrical, fuel and air systems.
	Check the fiberglass and other insulating parts are in good shape with no cracks. Pay special attention if cracks are on the mount wall.
	Check all mechanical fasteners and locking pins.
	Check all cable and wiring harnesses.
	Check for any loose or missing parts.
	Check that the guardrail systems are stable.
	Check for missing or unreadable placards, warnings, or operational, instructional and control markings.
NOTES:
